Avicola Andina SpA - Chicken and Egg Producers

## Avicola Andina SpA - Chicken and Egg Producers

Selling eggs under the “Huevos Yemita” brand located in San Antonio

**These are the results we have received from this Poultry farm after 8 weeks of using Crystal Blue Structured Water:**

**The chickens were 56 weeks old, previously affected by respiratory problems in a pyramid shed that is 17 years old.**

### **Chicken Related Observations:**

- a) Increased water consumption in 12% (this is good because it means that the chickens drank water whenever they desired. They need to be as comfortable as possible.)
- b) Increase in weight: 1.6%.
- c) Recovery after eggs laid increased more than 15% (meaning an increase in the number of chickens laying eggs).

### **Equipment related Observations:**

- a) The sediments in the small containers, located before the nipple from where the chickens drink water, disappeared.
- b) There was a considerable reduction in the mineral buildup of the pipes.
- c) There was a considerable reduction in the mineral buildup in the nipples, recovering their functionality to 100%.
