

Hostetler's Farm, Arkansas

"I made more money than ever before after installing water structuring units on two of my four chicken houses."

~Raymond Hostetler, Arkansas

BENEFITS

When chickens got sick, they recovered more quickly after treatment

The chickens in houses with structured water got less complications after being sick than those in houses without structured water

Placed above all other regional poultry growers in cost per pound per net gain

Ammonia smell was eliminated from the chicken house

Chickens were more alert

Hostetler's Poultry Farm, Missouri

"We invested \$5,000 for water structuring units at our 42,000 bird operation. Livability went up 5% giving us about 2,000 more birds. All of our birds started laying sooner and stayed at peak longer, which meant an extra 50,000 dozen eggs. Our earnings increased by an average of \$4 per bird."

- Marion Hostetler, Missouri

BENEFITS :

- * Chickens started laying younger;
- * Eggs were up to size quicker and case weight came up faster;
- * Mortality was lower giving one farm 2,000 more birds in production over previous flocks;
- * Ammonia and manure smell disappeared;
- * Faster growth rates, higher production at peak and the peak lasted longer at above 96% for 3 to 4 weeks longer;
- * Net earnings rose upwards of \$10 per bird compared to \$6 per bird without structured water - for 42,000 birds.

Chicken Barn Poultry Platte Colony

Since we installed your Crystal Blue structured Water units on our large chicken barn, the chickens are much healthier, have better shell quality, the ammonia smell has been completely eliminated and the chickens are gaining healthy weight more quickly.

Dale Stahl, Director of Operations
